I pay for XM Radio because I live in southern California and there is not ONE FM station that comes in clear all of the time as I drive the area. I don't LIKE to pay for this service, but I get such awful reception from local stations that they are essentially useless to me. Also, the amount of advertising time they are allowed is ludicrous. Since I am willing to pay for this service out of my pocket directly (as opposed to indirectly via advertising) I want my TRAFFIC AND WEATHER INCLUDED!!!!
